# TMACC: Road To Leetcode!

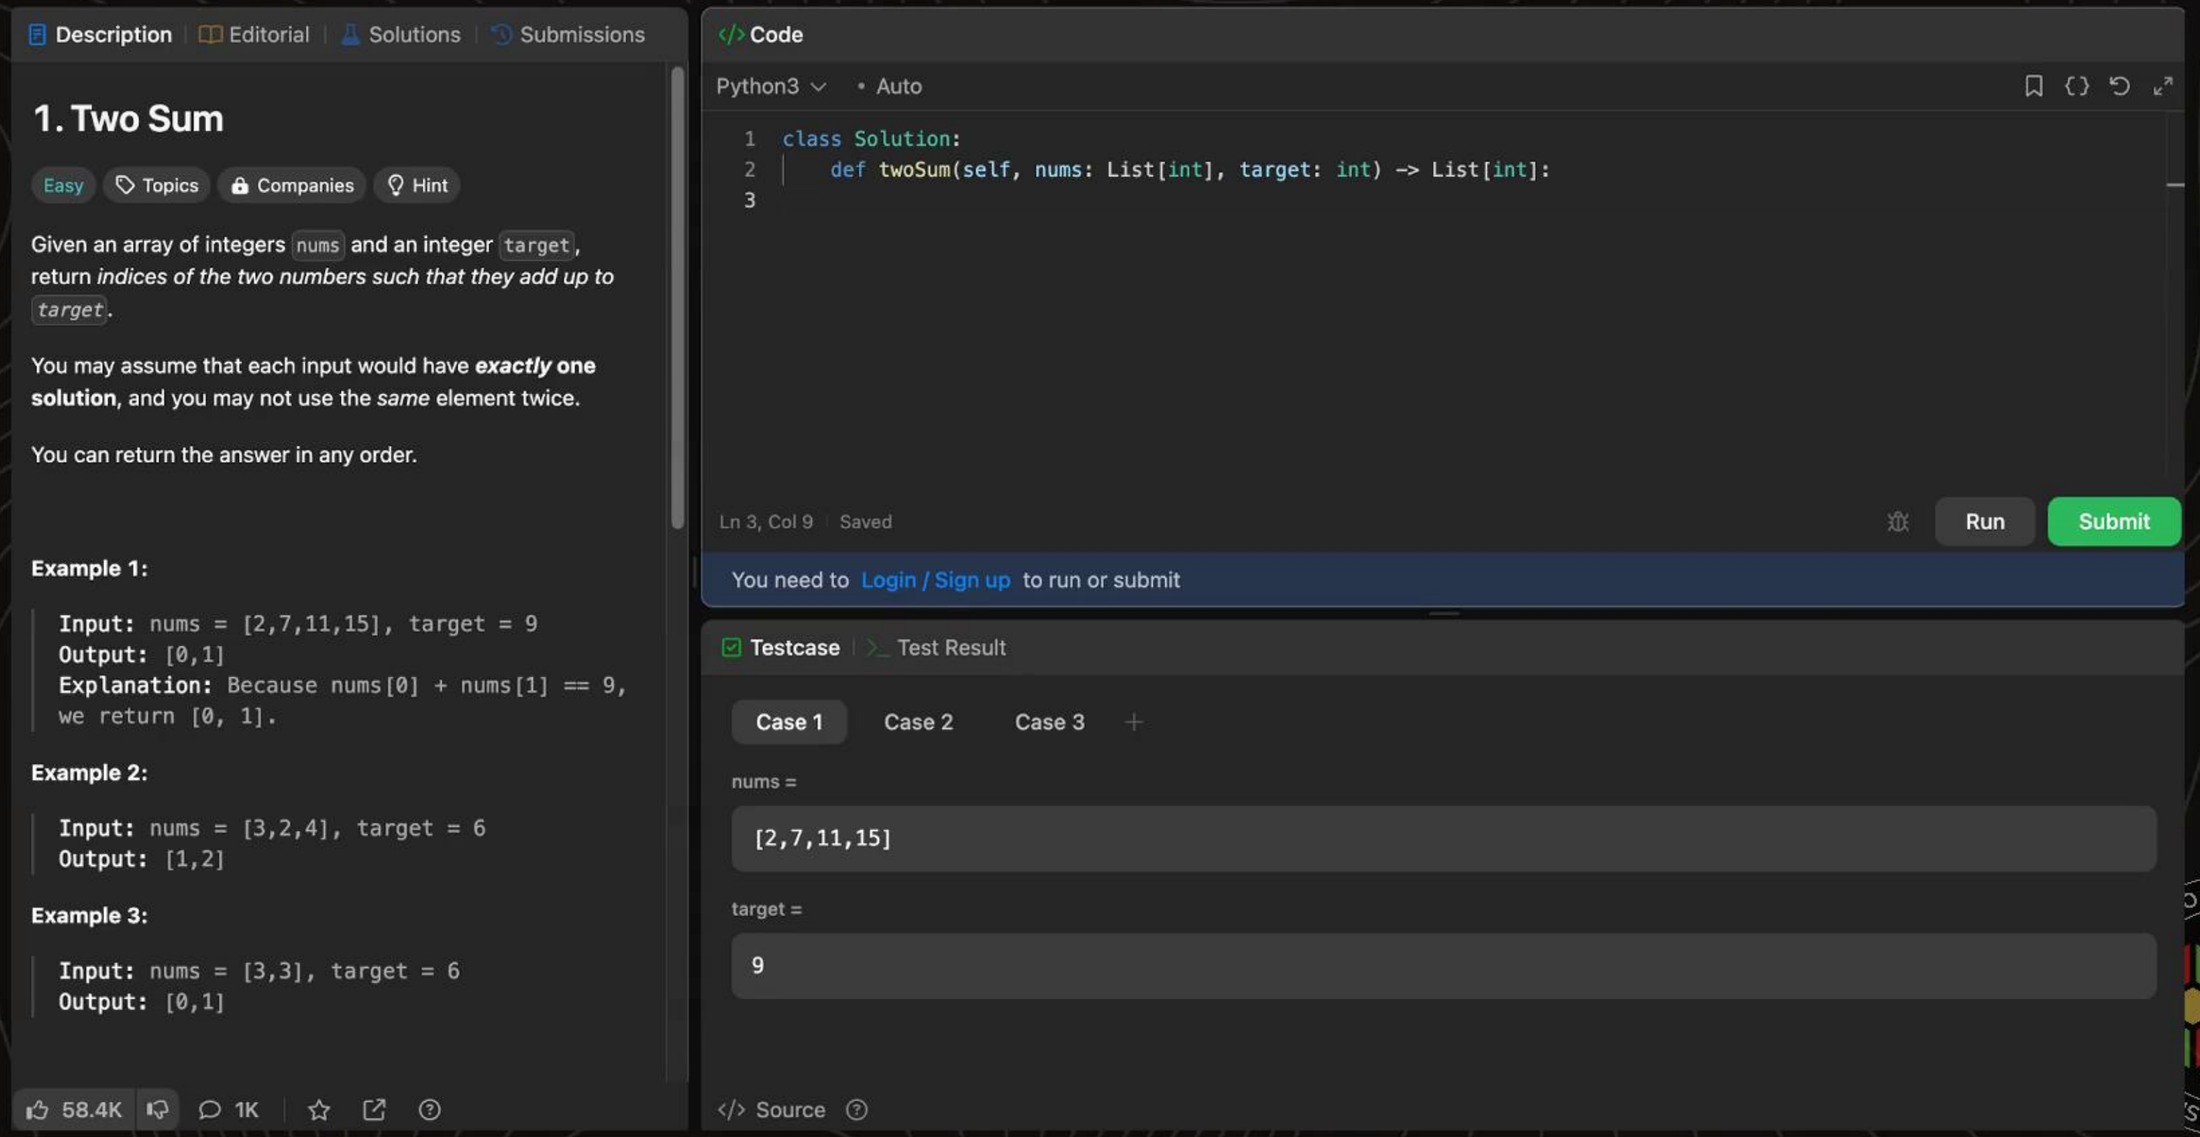

TORONTO METROPOLITAN ALGORITHMS AND CODING CLUB

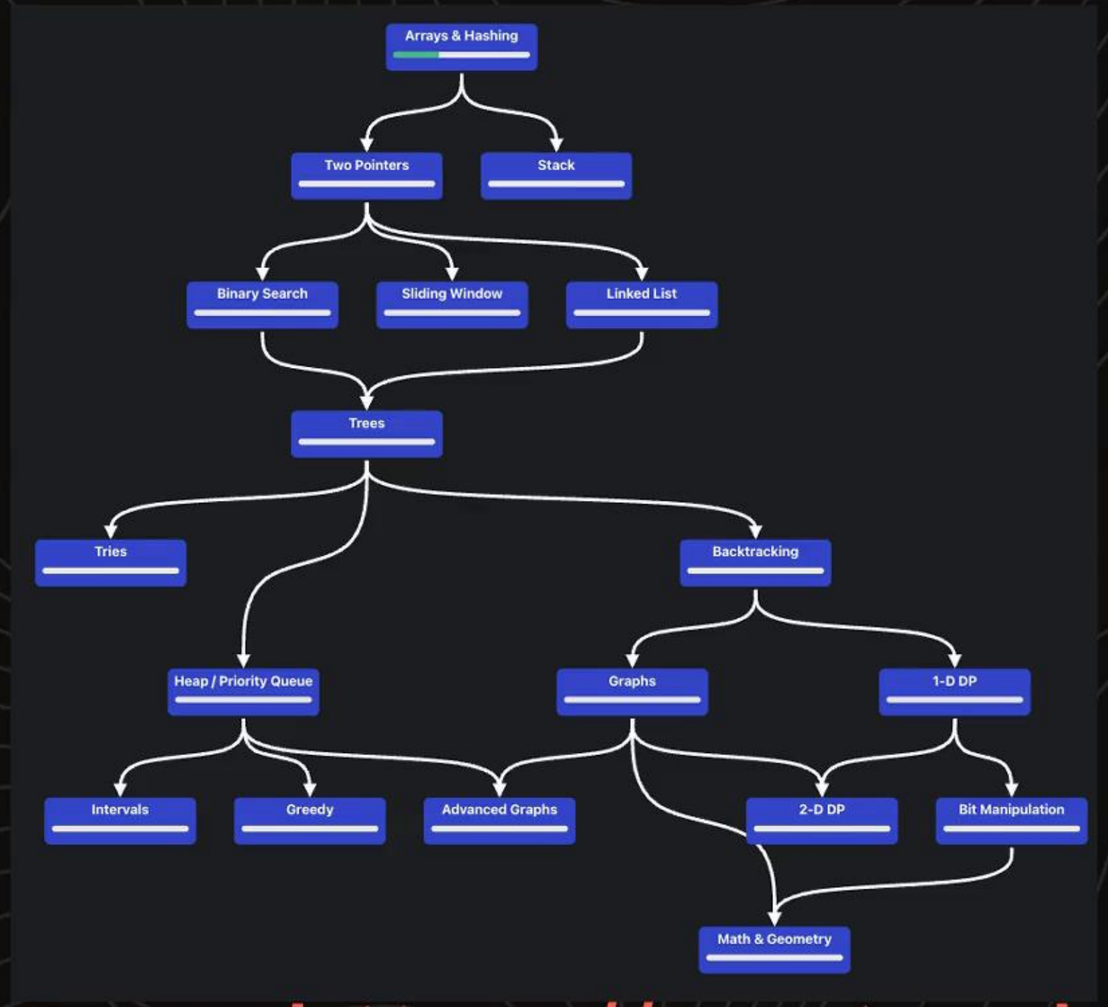

# Schedule

- 6:10: Event Introduction + Overview
- 6:35: Let's start coding!
- 7:00: Snacks!
- 7:20: Event over! Time for solutions.

# What is Leetcode?

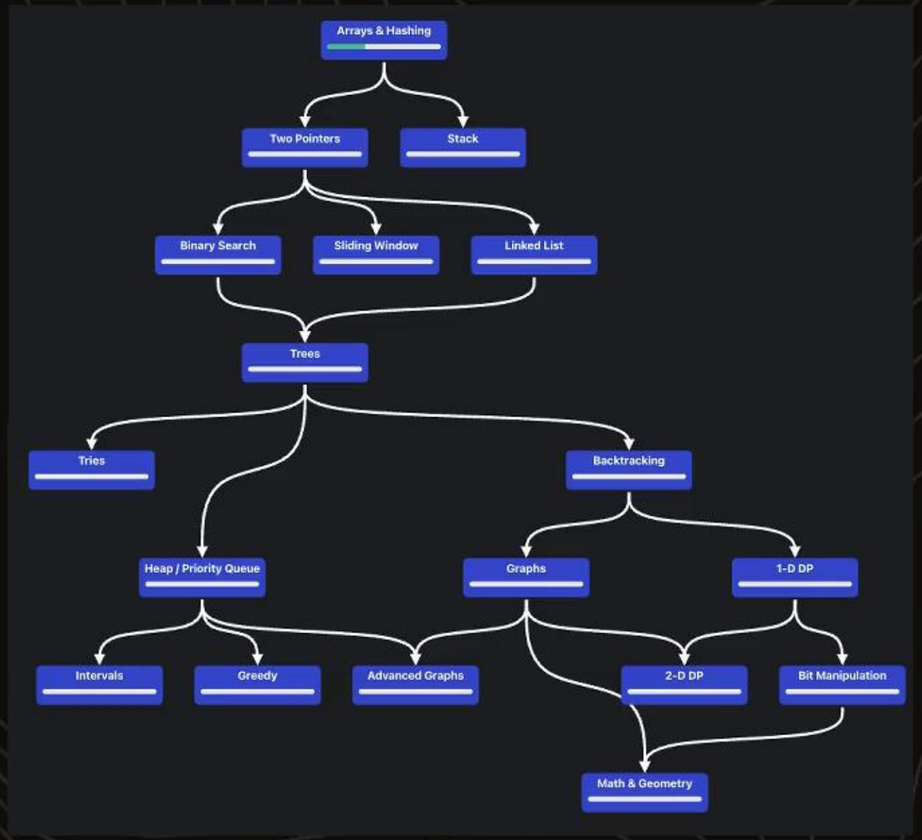

# NeetCode Roadmap (Part 1)

TORONTO METROPOLITAN ALGORITHMS AND CODING CLUB

# NeetCode Roadmap (Part 2)

One problem: NeetCode is not entirely free!

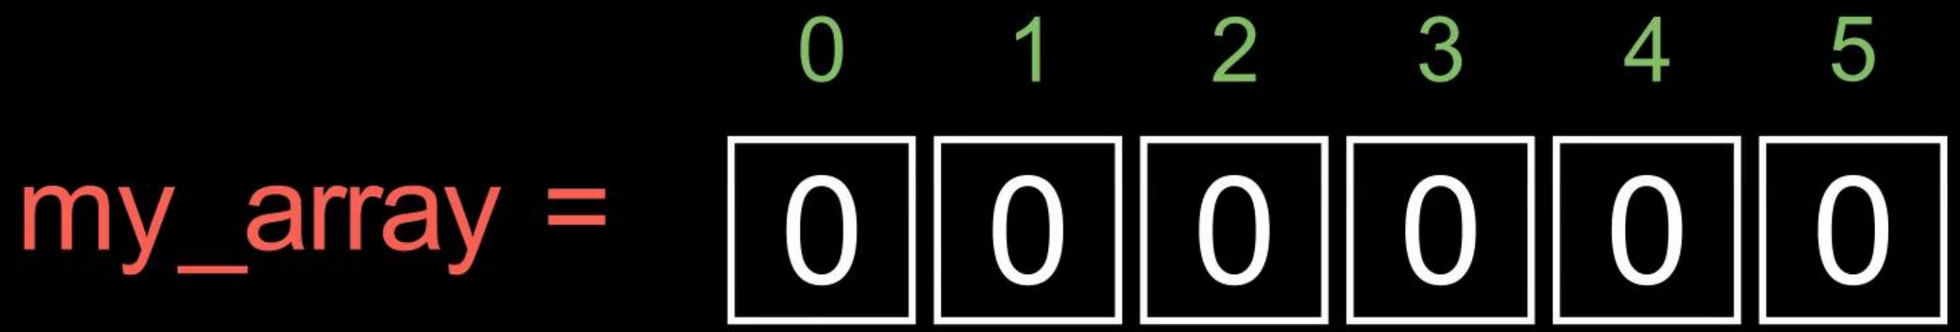

Goal of LeetCode Roadmap:
Go over each topic throughout the year.

TORONTO METROPOLITAN ALGORITHMS AND CODING CLUB

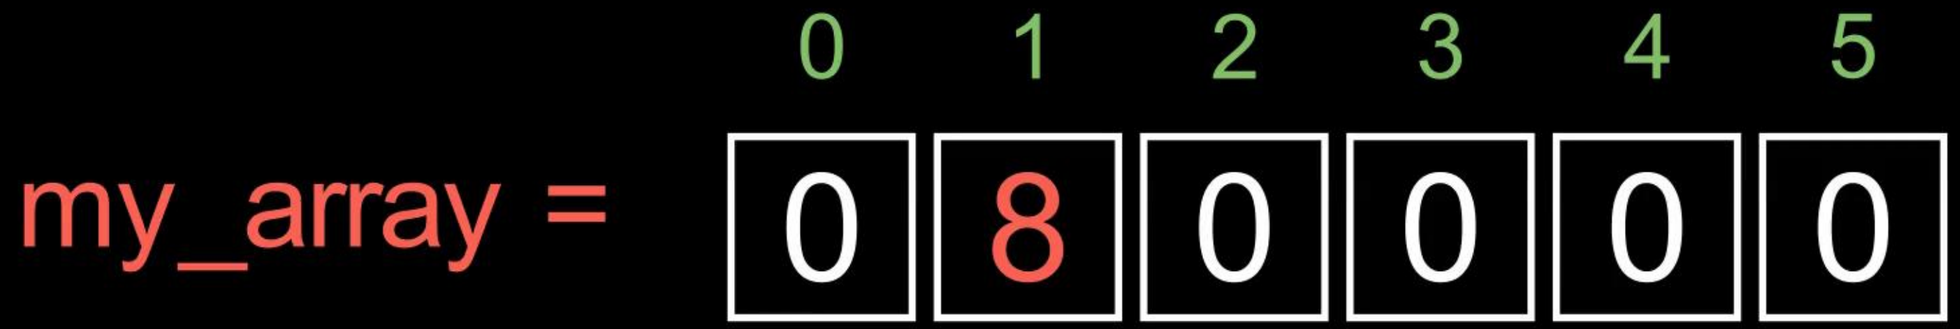

# Welcome to Road to LeetCode!

## Week 1: Arrays and Hashing

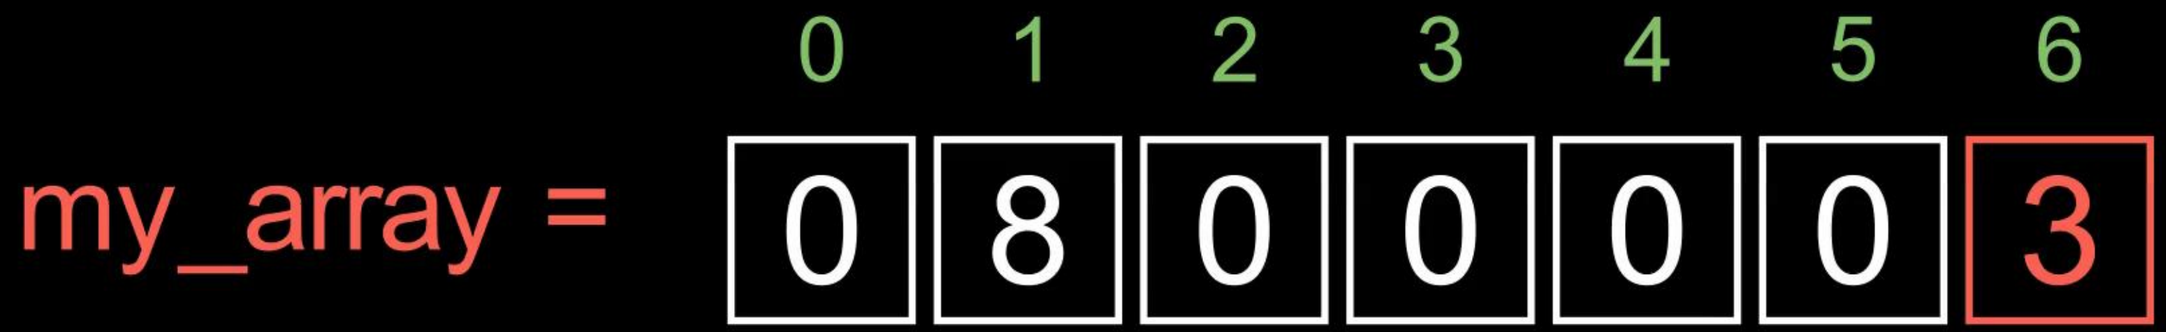

```
my_array = [0, 0, 0, 0, 0, 0]
```

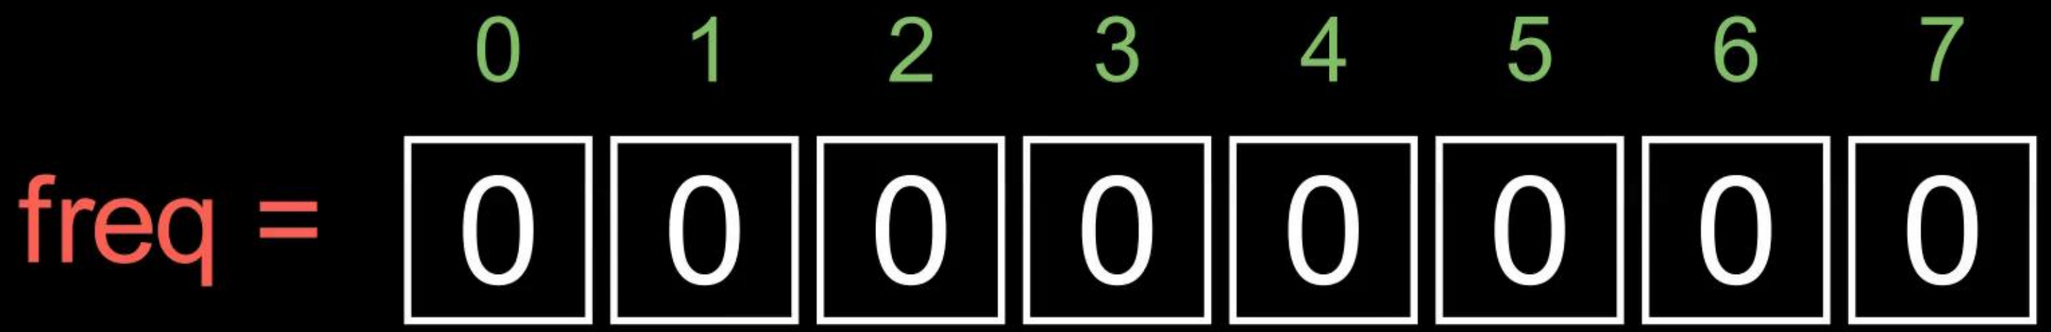

0 1 2 3 4 5
my_array =
0 8 0 0 0 0

```
my_array[1] = 8
```

TORONTO METROPOLITAN
ALGORITHMS AND CODING CLUB

```
my_array.append(3)
```

## Frequency List:

3 6 1 3 4 4 1 2

| | 0 | 1 | 2 | 3 | 4 | 5 | 6 | 7 |
|---|---|---|---|---|---|---|---|---|
| freq = | 0 | 2 | 1 | 2 | 2 | 0 | 1 | 0 |

Frequency List:

3 6 1 3 4 4 1 2

my_set = { 1 3 5 6 }

```
my_set = {1, 5, 3, 6}
```

my_set = { 1 3 5 6 8 }

```
my_set.add(1)
```

my_set = { 1 3 6 8 }

```
my_set.remove(5)
```

my_dict =

```
{
  key1: 5,
  key2: val,
  key3: 2,
}
```

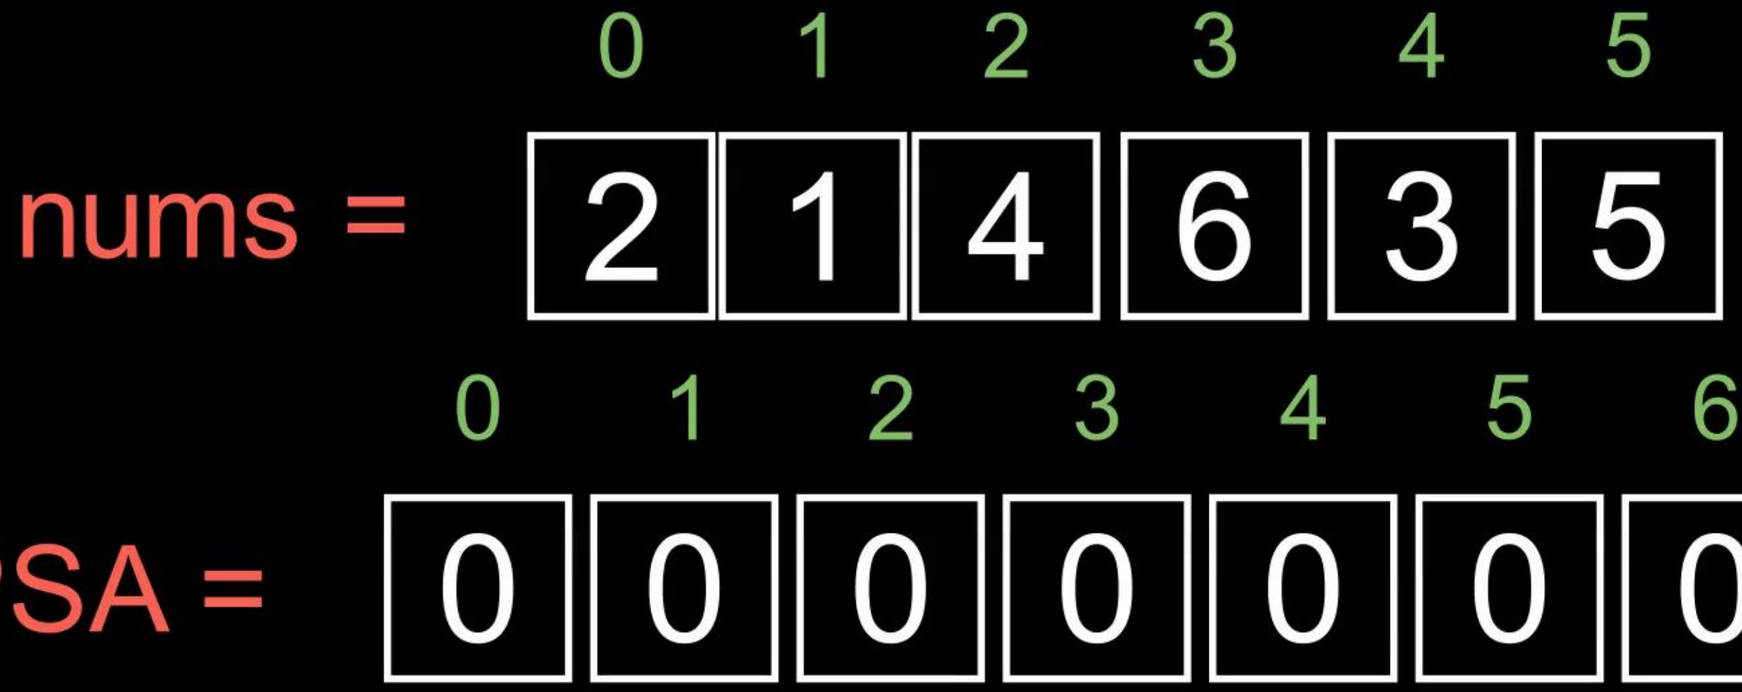

```
my_dict = {'key1':5, 'key2':'val',
'key3':2}
```

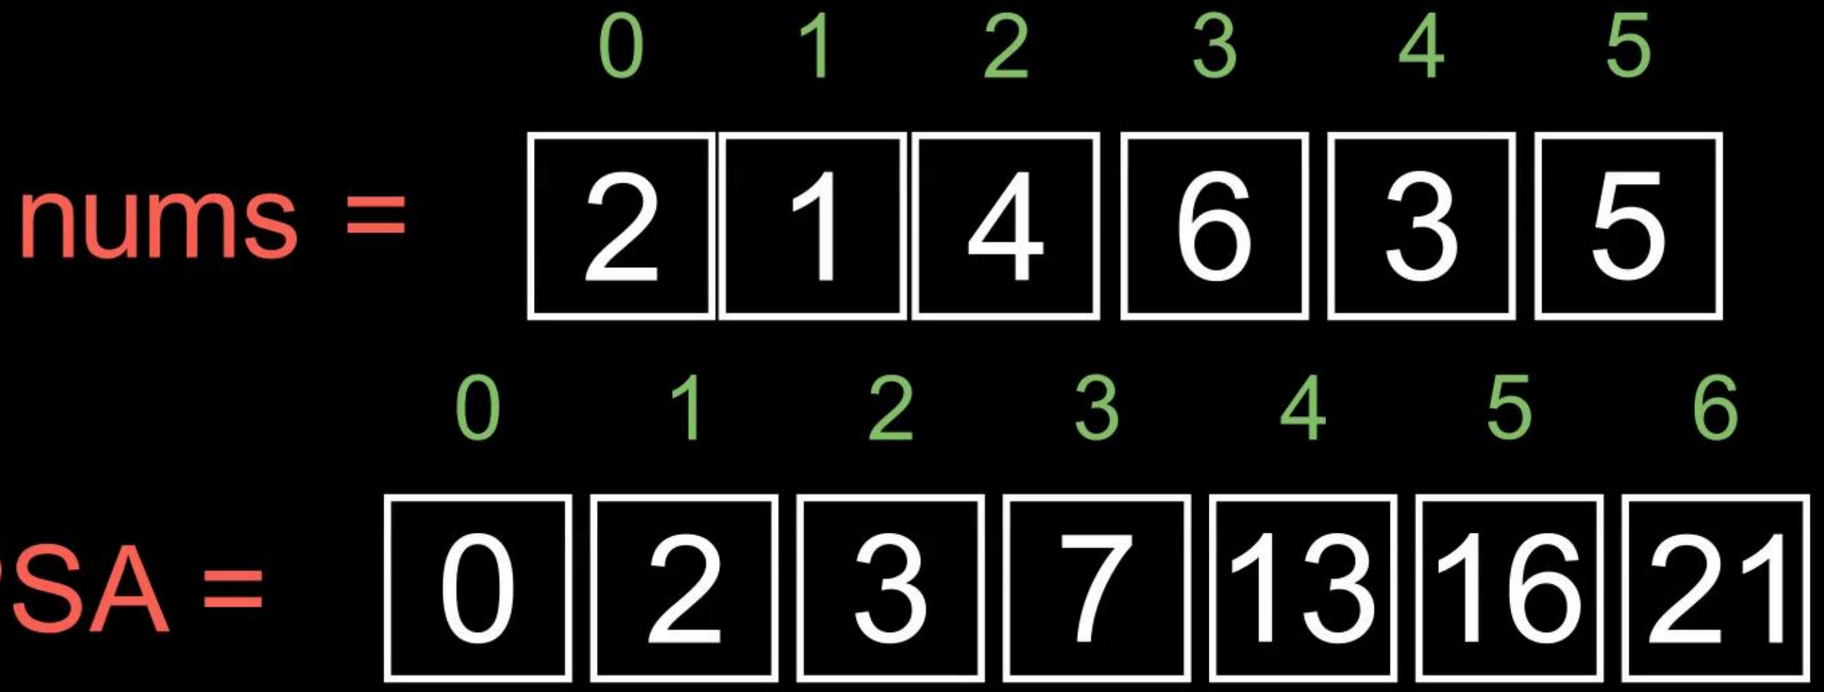

```
my_dict = {
    key1: -1,
    key2: val,
    key3: 2,
    key4: 8,
}
```

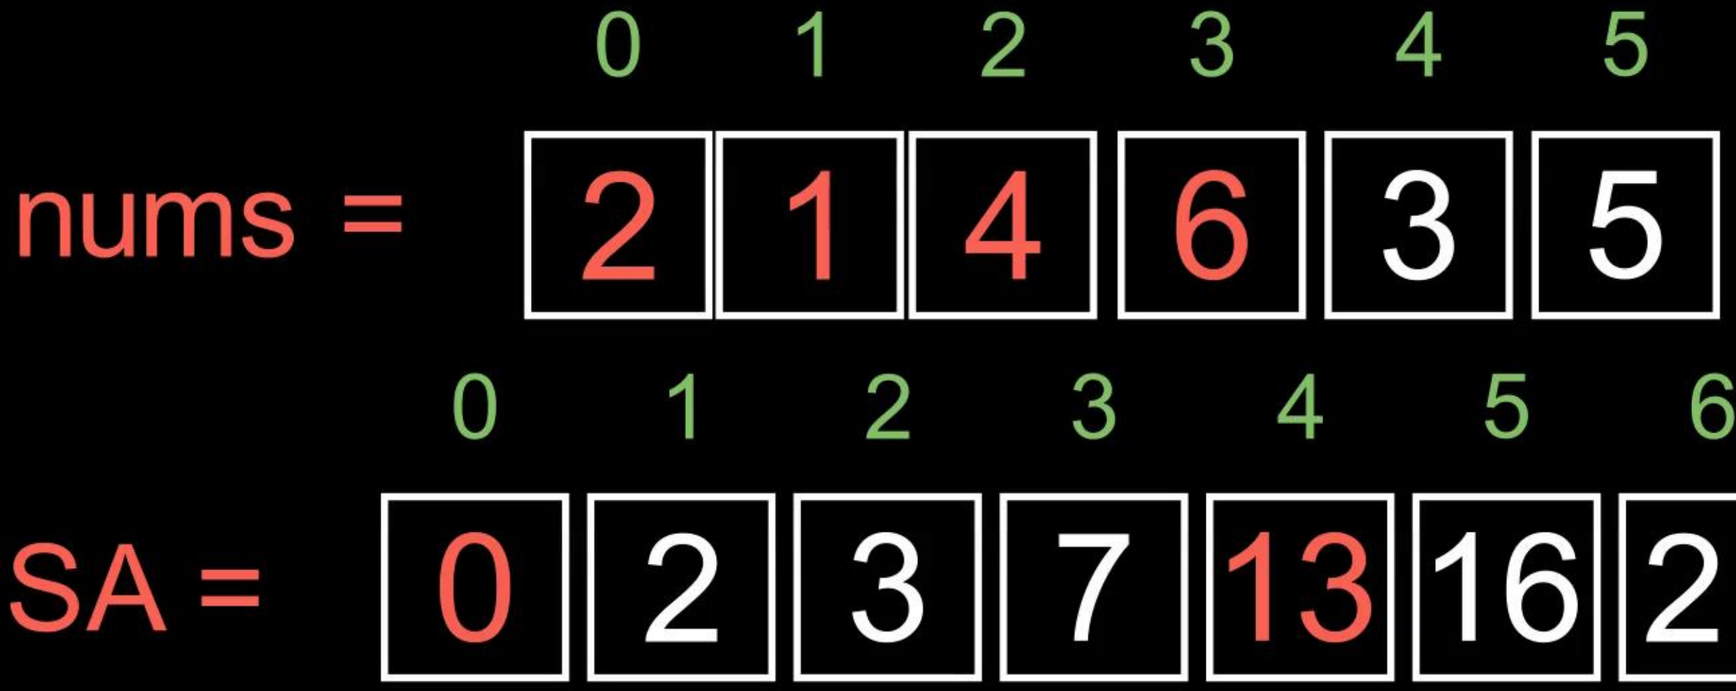

```
my_dict['key1'] = -1
```

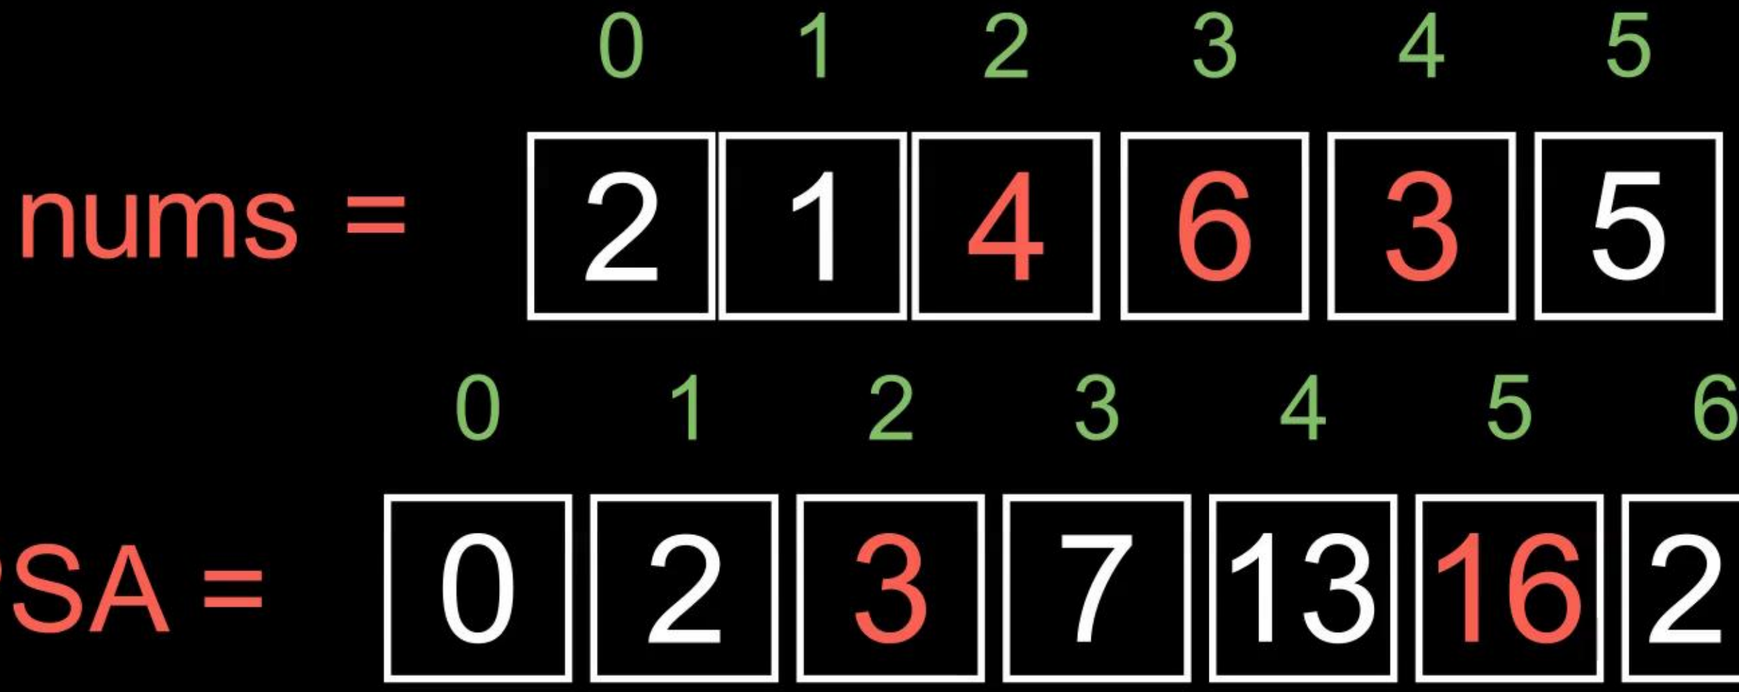

```
PSA = [0, 0, 0, 0, 0, 0, 0]
```

0 1 2 3 4 5
nums = 2 1 4 6 3 5
0 1 2 3 4 5 6
PSA = 0 2 3 7 13 16 21

```
sum(nums[0..3]) == PSA[4] - PSA[0]
```

```
sum(nums[2..4]) == PSA[5] - PSA[2]
```

# Access Problem Set

- Register/login at leetcode.com
- Go to linktr.ee/torontometacc
- View 'TMACC Road to Leetcode - Problem Sets'

</> Code

Python  Auto

```python
class Solution(object):
    def addTwoNumbers(self, num, num2):
        # Inputs are "num" and "num2"

        # Use print statements for debugging
        print("My first number is", num)
        print("My second number is", num)

        output = num + num2
        # You need to return your answer
        return output

```
